

BURKBURNETT'S A CROWDED CITY

Need of Sanitation and Hotel Accommodations Pointed Out.

Burkburnett, Texas, Nov. 11.—Burkburnett, now a city with approximately a population of 4,000, is greatly in need of hotels and sanitation. The town is 15 months old and has no hotels. There are three hotels with 10,000,000 deposits and the lowest wage is \$6.50 per day. The 1000 towns in the city are each paid 700 a day. And yet Burkburnett is without improvements, all men are pointing out.

One hundred thousand dollars have been collected for street improvements, but no improvements have been made. Burkburnett is without a sewer or a paved street.

There is a daily production of 10,000 barrels of oil. The city is in need of adequate transportation facilities. There is plenty of gas, but no gas pipes. More than 100,000 in lost daily owing to inadequate facilities for transporting oil and gas.

BURKBURNETT'S VALUATION EXCEEDS COUNTY SEAT

The tax valuation of the oil city of Burkburnett, Wichita county, Texas, exceeds that of Wichita Falls, the county seat by about \$4,000,000.

Would Like Secret For Looking Well

"Two weeks ago I weighed 95 lbs. Now I weigh 185 lbs. and feel perfectly well. Anyone I see suffering I tell them of what Myer's Wonderful Remedy has done for me. They all want to know what makes me look so well. Their medicine has also been a real life-saver for my mother. I cannot recommend it too highly for stomach trouble." It is a simple, harmless preparation that removes the external cause from the intestinal tract and allows the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One does not lose weight or money. At all drug stores.—Adv.

Wichita Falls Wells Are Shut Down For Time

Pipe Lines Still Unable to Take Care of the Production.

Wichita Falls, Texas, Nov. 11.—During the past 10 days a number of good wells have been completed in the Wichita district, adding 21,000 barrels of new production to the pipe line run of the week. Owing to insufficient transportation facilities it has been necessary to shut in these wells until their production may be run.

The average daily runs of the Burkburnett field total approximately 11,000 barrels. Wichita, averaged 10,000 barrels; Iowa Park, 600 barrels; Petrolia, 400 barrels and Holliday 100 barrels.

Operations are going forward at a rapid rate since the rains stopped. In the south Burkburnett district a number of wells are shut in, pending storage and pipe line facilities or for necessary supplies. The Atkinson Oil company's No. 1 H. Willis is shut down on the sand with the casing set at the 1200 foot level.

The No. 1 Bench W. E. Conner is waiting for a second string of tools before completion. The well is in the sand at 1200 feet. It is situated near the Tanager well, which opened up the 1200 foot sand a few weeks ago.

The casing is being reset in the Rump-Monker-Allyn well. The well will be brought in within the next several days.

Wichita Falls To Have Good Fire Department

Wichita Falls, Texas, Nov. 11.—The fire department of Wichita Falls will be increased in compliance with the demands of the state fire insurance commission at Austin. The capacity of the pumping plant will be increased, additional firemen will be employed and 2700 feet of fire hose will be purchased and also two new hose wagons.

The state fire marshal and the chief of the Texas inspection bureau visited Wichita Falls a few days ago and decided that the above increase in equipment and men is necessary. Wichita Falls has grown from a town of 12,000 to a city of 45,000 within two years. Goods are arriving and being sold so fast that it is almost impossible for trash to be burned and it has accumulated, constituting a fire hazard.

RANGER WELLS ARE COMPLETED

Comanche Northern Company No. 3 is Making 1000 Barrels.

Ranger, Texas, Nov. 11.—The No. 3 well of the Comanche Northern Oil company is making a daily production of 1000 barrels of oil at a total depth of 2725 feet, having been just completed.

The Prairie Oil and Gas company's J. T. Roper No. 4 has recently been completed at a depth of 3425 feet. The well is making a daily production of 700 barrels of oil from the top of a sand found at the 2400 foot level. The No. 7 on this tract is drilling at 1500 feet and the No. 4 is running the eight and one-fourth inch casing at a depth of 2550 feet.

Prairie Wells Drilling.

On the E. Roper tract the Prairie Oil and Gas company's No. 2 is moving in tools at a depth of 3425 feet. The No. 4 has been completed during the past few days and is now making 20 barrels of oil after being shut in with 150 quarts of nitro-oil since it from 2425 feet to 4100 feet. The No. 12 is drilling at 2200 feet; the No. 23, drilling at 2400 feet and the No. 15 is drilling at 2550 feet.

In the Deidemonia field the L. A. White well of the Magnolia Petroleum company is flowing 600 barrels of oil daily. The well is now at a depth of 2510 feet.

The Humble Oil and Refining company's well on the Fry land, in the northwest extension of the Roper pool is making a daily flow of 600 barrels.

Well Is Abandoned.

The L. E. Turner well of the Prairie Oil and Gas company, in Stephens county, is being abandoned. The drillers are pulling the six and one-eighth inch casing at a depth of 3725 feet.

The Prairie Oil and Gas company's No. 2 on the Canfield tract is being abandoned. The well is making a daily production of 100 barrels of oil at a depth of 2600 feet.

A daily production of 800 barrels is being obtained from the Humble Oil company's No. 4 State Land at 2515 feet. The well is also making 1,000-600 cubic feet of gas at this depth.

El Paso Herald Magazine Agency—Adv.

BEST WILD CAT LOCATION HE EVER SAW

W. G. Harrison, the oilman, has just completed, after a run of 10-1000-acre lease near Turner, Texas, says: "The structure is perfect and it is the best wild cat location I ever saw."

All of our material is on the ground and drilling will begin this week. Remember this is not a pinner claim, but a ten-year commercial lease.

Every oil company that has paid tremendous profits to its stockholders has done so on wildcat acreage. Now Creek Oil Co. had 2,500 acres and their stock is now worth \$25,000 a share. Please for yourself your profits when we get production on 10,000 acres.

We have enough proven acreage to guarantee the success of the company. The first well is fast approaching the sand in the Deidemonia field. Gamble on a case that you'll have to play to win. Harry your odds.

To Handle All Oil At Homer In Short Time

Wilson Porterfield Writes That Production Can Soon Be Disposed Of.

"An immense increase in production figures for the Homer district is expected before January 1, and as much sooner as tanking with the capacity of 2,500,000 barrels already contracted for can be fabricated and erected," writes Wilson C. Porterfield, from Shreveport.

"Forty-six 10,000-barrel tanks have been contracted for; four short pipelines from production to loading racks and storage are in operation, or will be within two weeks; another tank farm is reported under consideration by the Texas Company and an 8-inch line from Bull Bayou to Homer is reported under way, while still another has been partially completed from Shreveport to Homer."

"With all these storage and transportation facilities working, production has been partially disposed of, and the interval of waiting to the minimum."

"The Standard Oil company is building 15 55,000-barrel tanks on the Grider farm near the center of production. The Texas Oil company is building 15 tanks of the same size at Sibley, Gilliland and Foster are building five more at Homer and another five on the Martin farm, half way between Homer and Sibley, and the Louisiana Oil and Refining company is building six at Leroy, a new location on the L. & A. where it was built by the Texas company. It has a direct line to the refinery at Shreveport."

Mr. Porterfield is now at Shreveport to look into making a contract to sink the first well on the property of the Homer company.

MINERAL WELLS REFINERY PRODUCTS CO. CHANGES NAME

Mineral Wells, Texas, Nov. 11.—The Mineral Wells Refinery Products company has changed its name to the Building Pipe Line and Refining company. This change was largely made by the relocation of the company's plant. It will construct a pipe line from the Caddo field to Mineral Wells and will build a refinery at both points.

The company's original plans were to erect a refining plant at Mineral Wells and either the Caddo field or the Caddo field. The company's original plans were to erect a refining plant at Mineral Wells and either the Caddo field or the Caddo field.

The company's original plans were to erect a refining plant at Mineral Wells and either the Caddo field or the Caddo field. The company's original plans were to erect a refining plant at Mineral Wells and either the Caddo field or the Caddo field.

FOOLING WITH HEALTH SERIOUS

"I have frequently asked druggists 'What do you push in a blood medicine?' and the answer has always been 'Net me.' I have always recommended the one that I had found by experience to be the best and the one I would be willing to take myself or give to members of my own family. I have never offered the public a medicine that we do not use at home. This is why I can offer 'Number 40 For The Blood' with a tried and true record of others out ourselves. We take it in all cases where a blood medicine is needed, no matter in what form it shows itself, and we get splendid results in constipation, kidney, stomach and liver troubles. Firmly believe if every one would begin in the spring and take 'Number 40' they would escape malaria and fever in all forms. J. C. Henderson, 40 years a druggist, Evansville, Ind. Sold by Kelly & Pollard, wholesale.—Adv.

GOOD PROGRESS REPORTED IN DRILLING NEAR SNYDER

Snyder, Texas, Nov. 11.—Good headway is being made in drilling a well near Snyder. The Fluoranna well is drilling at 700 feet.

The Snyder Oil association is drilling for water at a depth of 310 feet. The Oklahoma-Snyder well near Doss is being water a fishing job.

A casing in the Fluoranna well is delaying the drilling of that site.

HURRY TO FILE LEASES IN THE NORTHWEST OIL DISTRICT

Carro, Texas, Nov. 11.—Leases for between 10,000 and 15,000 acres of land were filed here in a single day from the Northwest district. Indications are good for oil on every acre, according to geologists who have carefully examined the surface structure. This was a large number of leases never filed in this county during one day.

LEON COMPANY BRINGS IN WELL

No. 8 on the Allen Tract is Making 2000 Barrels a Day.

Eastland, Texas, Nov. 11.—A 2000 barrel well has just been brought in by the Leon Oil company. It is the company's No. 8 on the Allen tract, four and a half miles north of Eastland.

El Paso parties have purchased ten acres from the Occidental Oil company of Abilene, which is now erecting a derrick for a test to be drilled on the remaining 16 acres of the company's lease on the Burkett farm. The El Paso parties have obligated themselves to drill four tests on this acreage, one of which is to be begun at an early date.

The Leon Oil association has produced about 2000 feet east of the Occidental Oil company's test.

Production Cut Off.

The Ardmore-Graden Oil company's No. 1 is making approximately 150 barrels of oil. A better production was found in this well below the 2200 foot level, but the No. 1 is shut down temporarily because of a leak in the casing. It was pulled down when the drillers attempted to draw the six-inch casing from the hole to learn whether it had been perforated by the explosion of 140 quarts of nitroglycerin at a depth of 2350 feet. The well is shut down.

On the R. L. Howard tract the Prairie Oil and Gas company's No. 1 is running up at a depth of 4500 feet. The No. 4 is shut down temporarily because of a leak in the casing. It was pulled down when the drillers attempted to draw the six-inch casing from the hole to learn whether it had been perforated by the explosion of 140 quarts of nitroglycerin at a depth of 2350 feet. The well is shut down.

EL PASO MAN GETS GOOD JOB IN WAGON FACTORY

John A. Hitchcock, formerly of El Paso, has been appointed manager of the Electric division of the Western Wagon Works at Toledo, Ohio.

Mr. Hitchcock is the son of Mrs. Richard Hitchcock, 1814 North Florence street. An served in France as a first lieutenant in the air service. When in El Paso, he was with the El Paso Foundry and Machine company.

Marigold Hits Oil In First Well Put Down

Company Preparing to Drill Second Well; Refuses All Offers to Buy.

Marigold Oil and Gas Co., according to a telegram received Monday, by George H. Pound and company from C. C. Williams, secretary of Marigold, has struck oil in its well No. 1.

This company now proposes to drill another well in its holdings in the Marigold field, near the intersection of the General Oil company's No. 1 and the Marigold well in block N. W. Burkburnett, near 25 acres owned by the Marigold company; also, that United Cider and two other wells, close up, are setting their casings. The telegram follows:

"Marigold No. 1, block N. W. Burkburnett, pool, was coming at 1654 feet, but about 18 feet in the richest sand of any well in this field. Well began drilling No. 2 on this acreage at 2300 feet. No. 1 is drilled in. We have refused all offers for sale as pipeline connections have been assured. We are overjoyed at prospects. The General Oil company has a 2000 barrel well in block N. W. Burkburnett, near 25 acres owned by the Marigold company; also, that United Cider and two other wells, close up, are setting their casings. The telegram follows:

MONARCH COMPANY TO BUILD BIG REFINERY AT DALLAS

Dallas, Texas, Nov. 11.—Dallas is to have another oil refinery. The Monarch Petroleum company in West Dallas upon which to erect a refinery. Construction work will begin on or about January 1. The approximate cost of the plant is estimated at \$1,000,000. It will have a daily capacity of 1000 barrels.

The company is backed by a capitalization of \$2,000,000 and is controlled by some of the most experienced oil and refining men in the midcontinent field.

CALIFORNIA MEN ACQUIRE LEASES IN FISHER COUNTY

Walter J. Barnhart and E. L. Foster, of California, have acquired 200 acres of oil leases near Shreveport in the southwest corner of Fisher county, Texas. The Foster Oil company has been organized to exploit these holdings and it is said that six car loads of drilling machinery are being shipped from California to the new Texas property to put down the first well seven miles west of the Shreveport well and about the same distance south of the Strauss well.

BIG WELLS ON EACH SIDE OF AMERICAN LAND

Claude A. Brown, former newspaper man of El Paso, now at Shreveport, who has been making a trip by auto through the Louisiana oil fields, reported on the holdings of the American Oil and Refining company, in a telegram received Tuesday by George H. Pound & Co.

"American Oil and Refining company acreage in Homer district is located between two of the largest wells in the district. Only a few hundred feet distant from each of them; it is a fortune in itself," Mr. Brown wires.

OPERATORS WATER WELL IN THE ARMSTRONG DISTRICT

Tulsa, Okla., Nov. 11.—Oil operators are closely watching the Black and Jones well, south of Armstrong in the district southeast of Jennings, in Pawnee county. The well just came in with an initial production of 1200 barrels at a depth of 3600 feet. The production appears to come from the Bartlett sand, which is believed to be 60 feet thick at that point. The well is increasing its production each day and possibilities are strong for a monster gusher.

JUDGE FISHER

One of the Founders of the Texas Company

—a powerful man to the oil world—alone will put the company over. But the company has some REAL power. This well No. 2 will be started right in the heart of production in the Homer field. Fred Kaulenberg, an attorney of El Paso, is now on his way to Shreveport to witness the signing of the company of the drilling contract for this well No. 2. Fred Kaulenberg was employed by the company to represent the El Paso interests. Judge Fisher will meet Kaulenberg in Shreveport.

Amalgamated Oil \$1.25

OUR SECOND OFFERING—which we announce now—at practically the over-subscription date of the Texas-Homer—is AMALGAMATED OIL CORPORATION, which has one of the largest proven acreage of any company offering stock today—over 625 acres, all of which is located in the Homer-Bull Bayou and Caddo oil fields—most of which is close to production and offsetting big wells.

This company is headed by such men as J. H. Patrick, Sam West, Jr., Walter Eisenmenger, Harry L. Crighton and H. E. Daly.

Any bank in Shreveport is referred to by these men as to the standing of the company. Very little of this stock will be offered here in the west, as application will be made to list it on the New York Curb.

We Offer Any Part of 10,000 Shares at \$1.25

We are here to give you the facts about the Homer and the Bull Bayou fields. We will execute orders in any of the attractive issues.
